Regulated Professions Database

- *The Regulated Professions Database is a database for the management of regulated professions in the EU and related statistics.*

- *Should contain all regulated professions in the Member States including relevant information and data*

European Commission

Main aims of the Database

- *Helps citizens be informed about the conditions to access regulated professions in other Member States and about the recognition procedures*
- *Collects statistics about the movements of professionals in the EU, i.e. on establishment and the provision of services*
- *Supports Member States and COM to fulfil the obligations under the Professional Qualifications Directive, i.e. as regards proportionality of new requirements*

Back end for authorities

- *Provide information on regulated professions, i.e. activities, national laws, competent authorities, requirements and proportionality*

- *Provide statistics on establishment decisions and provisions of services*

Validation/Rejection by COM

- *does not constitute legal approval/disapproval by COM*
- *Formal grounds (e.g., question not answered, information missing etc.)*
- *Suggestions/invitations to improve justifications or entries*

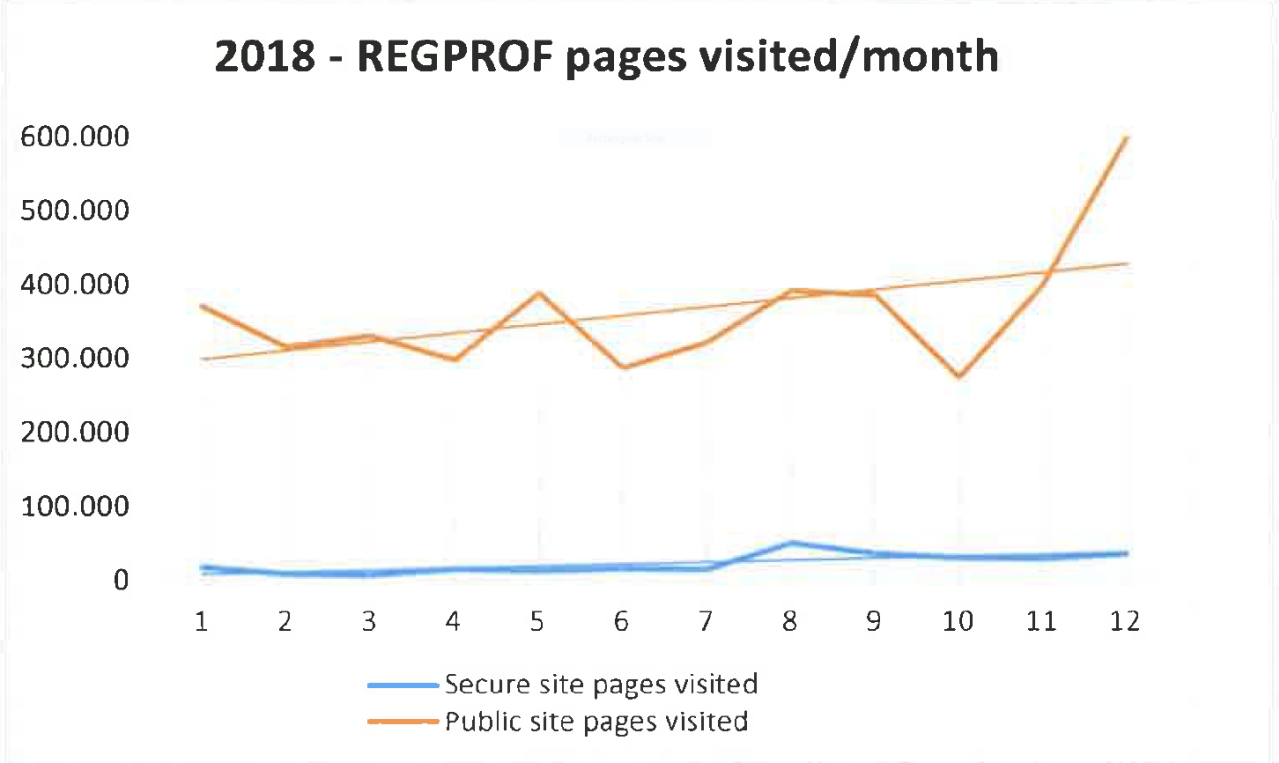
European Commission

Public Database

- *Almost all info provided in the general tab and the info in the screening tab are public once validated*
- *If a submitted and valid profession is "edited" the public site will continue to show the old information until the changes are submitted and validated*
- *If a profession is deleted it will be removed from the public database*

European Commission

Impact of the database



European Commission

Future of the database

- *Planned migration with IMI system*
- *In the course of a year preparation of data for migration*
- *COM might get in touch to get confirmation/clarification on certain data or information*
